INTEGRATED SOLUTIONS

Access Control | Intruder Detection | Security Management

ir inner range

Inner Range have been designing and manufacturing integrated Security and Access Control systems for over 30 years. Today there are more than 50,000 installed Inner Range systems delivering state-of-the-art solutions to corporations, government departments and institutions all around the globe.

All these organisations rely on their Inner Range systems, great and small, to secure and manage their critical assets.

The Inner Range research centre in Melbourne, Australia is home to a large engineering and product development team which is supported by an even larger complement of dedicated test engineers, trainers and IT technical support specialists.

Inner Range products are sold around the world by a network of authorised distributors who are committed to standards of service that reflect Inner Range's commitment to excellence.

The specifications and descriptions of products and services contained in this catalogue were correct at the time of publishing. Inner Range reserves the right to change specifications or withdraw products without notice.

The Integriti Technology Platform

Simplicity of Use

Large or small, everyday use of the Integriti system is simple. Unlock doors, turn on or off security areas all by simply presenting a card at a reader or by using the colour graphic keypad. Manage the entire system via intuitive Windows® based software.

Scalability

Integriti is perfect for small sites through to large multi-campus institutions. Only pay for what you want when it's needed; Integriti's flexible modular design means it grows with demand as required. And because it's an IP-based networked solution, utilise new or existing I.T. infrastructure for boundless connectivity.

Cyber Security

Inner Range's devices utilise cryptographic implementations including AES encryption that are certified by NIST through their Cryptographic Algorithm Verification Program to the FIPS 140-2 standard. The cloud services, servers, web clients, and mobile apps are secured with HTTPS / TLS and the MS SQL database can support TLS and TDE which uses AES 256-bit encryption.

Affordable on any Scale

Integriti delivers a state-of-the-art solution with tangible cost savings through its integrated Security, Access Control and Building Automation functionality.

Contemporary Design

Inner Range SIFER Card Reader & PrismaX Keypad

Use the Integriti system to:

-  Monitor and control the movement of all personnel and vehicles in the facility. Protect critical assets and manage the safety of staff and visitors.
-  Easily assign access permissions mandating who can go where and when, including visitor access.
-  Manage the reporting of security alarms and audit their responses.
-  Ensure compliance with business policies and government regulations.
-  Respond to emergency situations, lockdowns and alerts.
-  Manage WHS liability by leveraging competency-based access control permissions.
-  Remotely monitor and control the Integriti system with iOS and Android Apps.
-  Manage the entire security operation from a single user interface. With Integriti acting as the complete Integrated Security Management System (ISMS), integrate a variety of security sub-systems, such as CCTV, Biometrics, Mobile Duress, Lighting, Air-Conditioning, Intercom, Fire and much more.

The Software

The Integriti System Management Suite is a true cutting-edge solution. Featuring the very latest technologies, Integriti has been designed with an innovative and user-friendly design as its core focus.

Integriti Professional, Business & Corporate Software Editions offer everything your customer will need for complete system management. Each Edition includes GateKeeper and System Designer:

- Integriti **GateKeeper** for everyday card-holder programming, monitoring and control of the system.
- Integriti **System Designer** for full system programming and configuration.

Optional Web Client Interface and Smartphone Apps are also available.

Integriti Professional, Business & Corporate Editions

These Software Editions may be deployed on any number of local or remote sites. Individual sites retain their functional autonomy, while system users and permissions are managed globally across the entire organisation. These Editions also support a wide range of integration options to existing HR systems and a variety of third-party products.

Integriti Express

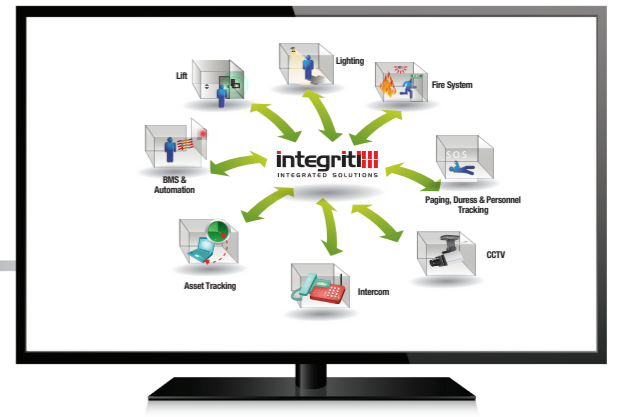

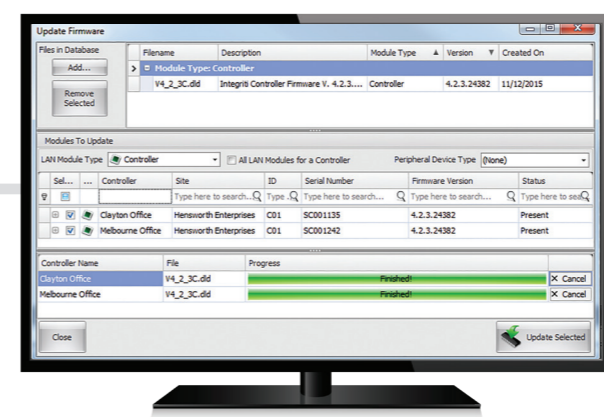

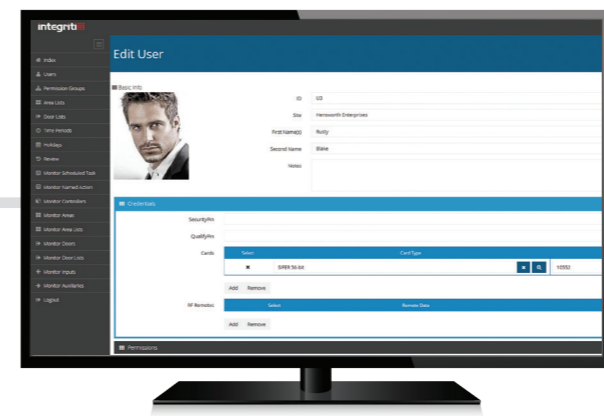

An Express version of Integriti is available for smaller single-controller sites. This is a great solution where the advanced features of the Professional version are not required.

Integriti Commissioning Software

Commissioning Software (CS) is also available for security technicians who are installing and commissioning Integriti systems. CS is provided to trained Inner Range security technicians.

Software features at a glance ...

- Web Client Interface.
- Programming and commissioning time significantly reduced via automated processes.
- Build cardholder profiles by assigning multiple permissions with simple "Allow" or "Deny" functions.
- Modern design, intuitive and simple to use.
- Complete alarm management with powerful automated actions.
- Rich graphics with interactive floor plans and scalable vector based maps.
- Forensic audit trail recording every programming change with the ability to "roll-back" any change.
- Email, text message and pager communications.
- Easy-to-use reporting such as Time on Site, Muster and detailed commissioning reports.
- Integration with Active Directory, HR, payroll and other database applications.
- Upgrade firmware for all Integriti hardware modules.
- Client/Server architecture, fully compatible with modern computing platforms using Microsoft SQL databases.
- Integration with other systems: CCTV, Intercoms, Building Automation, Personnel Tracking, Mobile Duress and many more. Use Integriti as an overarching Security Management System for complete control of security and facility services.

Remote Access To Your System

iOS and Android Apps

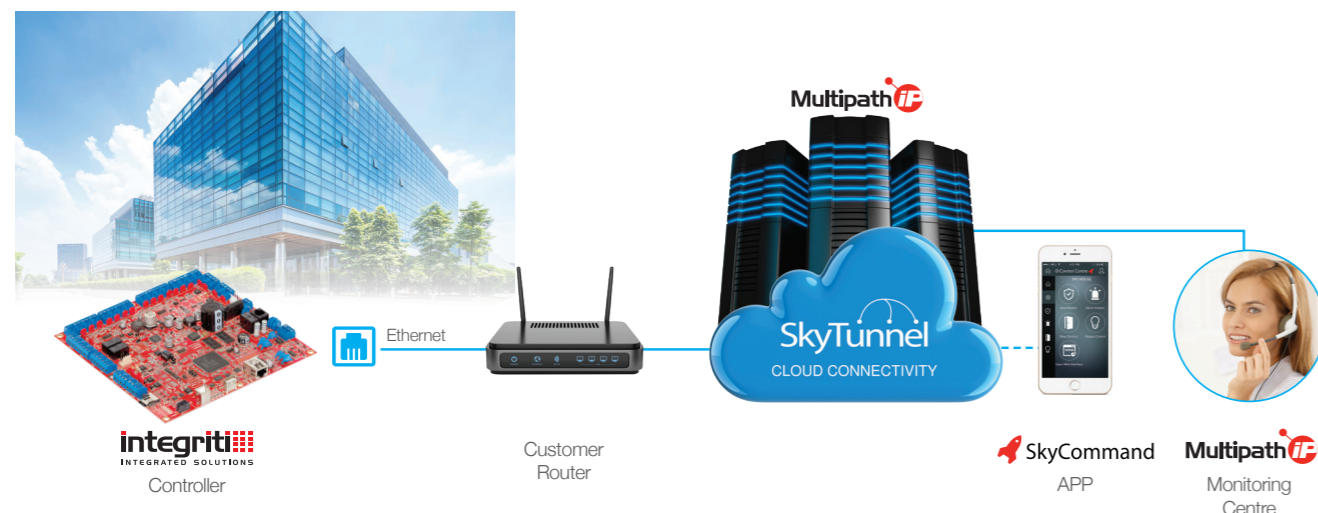

The Integriti Mobile and SkyCommand Apps pack a powerful punch of accessibility and control for your Integriti Security and Access Control system. With the tap of a finger, these exciting Apps allow remote operation of your Integriti system from anywhere in the world!

https://innerrange.com/RD/Integriti_Mobile_Apps

SkyTunnel

SkyTunnel is an industry-first cloud based service that provides hassle free connection of Integriti hardware, software and Integriti mobile Apps over the internet. No more wasted hours configuring routers and ports.

And it just makes good business sense ...

Healthy Choices 101

The recent \$2B Sunshine Coast University Hospital major government infrastructure project deployed Integriti as the platform of choice. Integriti provides access control for thousands of doors, security monitoring for thousands of alarm inputs and, most importantly, a sophisticated integrated security management system supporting 16 concurrent high-level interfaces (CCTV, Intercom, BMS, Fire, RTLS, KeyLocker, Lifts, Nurse Call and more). This solidifies the installation as one of the most significant electronic security integration projects in the past 10 years. Healthy choices, continuing rewards.

- Integriti, whilst feature complete, is at the early stages of its product development life-cycle. Your return on investment is optimised as the typical operational life-expectancy of an Inner Range system is measured in decades.
- Integriti boasts powerful, yet intuitive, cardholder permission programming. The use of "Allow" and "Deny" functions greatly simplify system administration. Operator training, and associated costs, are minimal.
- Detailed forensic Audit of Operator actions and programming changes, with ability to "roll-back" to any historic point.
- Integriti includes a feature-rich suite of tools such as graphical maps, powerful reporting, card printing, alarm management, compliance based access control, email/SMS/pager communications and much, much more.
- The Integriti system enables cardholder location and activity information to be shared with Building Management Systems, Air-Conditioning and Lighting systems to reduce the energy costs associated with these services. This represents real cost savings to the business.
- The Integriti system can share cardholder data with your company's Active Directory, Employee Database, Payroll System, Student Database or Booking System to reduce the labour costs associated with data entry and cardholder record management.
- Integriti supports a wide range of non-proprietary cards, readers, locks, detectors and other peripheral devices. You are not locked into buying the manufacturers specific consumables or peripheral components. A choice of vendors gives you the competitive advantage.
- Integriti is a non-proprietary system. You have a wide choice of competent security companies from which to choose. Refer to the Inner Range website for the details of recommended companies.
- Inner Range does not impose annual license fees or mandatory Software Maintenance Agreements. Consider the Total Cost of Ownership over the system's lifetime when comparing an Inner Range system to others. You'll be pleasantly surprised.
- Mobile Apps for iOS and Android are available for remote monitoring and control.
